A SCIENTIFIC HOLIDAY

I was a scientist during the holidays. My cousins and I were working on chemistry. We made a chemical for salt. We used the chemicals sodium and chlorine. We made another chemical for Mercuric Oxide. We also made Silicon Dioxide which is composed of Silicon and 2 atoms of Oxygen. We made the chemical for cane sugar which is composed of 12 atoms of carbon and 22 atoms of hydrogen and 11 atoms of oxygen. We made Carbon Monoxide which has only 1 atom of Oxygen for each atom of Carbon. We made Carbon dioxide which is composed of 2 atoms of Carbon Monoxide. After we made Mercuric Oxide, we got some lens and made pure oxygen.

Michael Gruninger is in my Grade 2 Class, seven years old. He is very interested in Math and Science and does a lot of interesting work on his own. This essay was written in response to an assignment I made which was to tell the class what they did during the holiday of Teachers' Convention.

I think this is worthy of publication. He had no text book. No one told him how to spell a word. He did it all in class. Rather wonderful for a seven year old.

The following letter will be mailed to all Chambers of Commerce in the Province of Alberta just as soon as we receive a list of same from the Provincial Office who has received our Brief in connection with the possible abandonment of Grain Elevators and 5528 miles of rail line in the three prairie Provinces:Newspaper and magazine articles have reported that the "Grains Group" is proposing the abandonment of many grain elevators: and the two Canadian Railways have in the past applied for abandonment of 5,528 miles of rail line, mostly in the Prairie Provinces.

Because of this we believe that the small communities and the many farmers who will be effected, if these plans are re-submitted at the end of the deferment period at the end of 1974, should be banding together now to make a strong case against any such proposals.

Any such abandonment programs, I'm sure you will agree, will spell the death knoll of many small communities throughout the Prairies and add untold dollars to the farmers expenses.

We also believe that in opposing any such abandonment that you should enlist the support of any or all groups in your area or across the Prairies whose support would lend some weight to the cause.

The purpose of this letter, then is to solicit your support and action on these concerns that could have a far reaching effect on your community (the members of your organization).

Magrath and District Chamber of Commerce.
